How to read the Data Logger Error Code with computer connected to logger in hotspot mode

1. Press the data Logger communication button for about 10 Seconds (when you hold button for 20 seconds you factory reset it):

2. On the lower Right corner menu, click on your computer on the "Wireless Networks" icon:

3. Select the Wireless Network with the name: **Saveris2 SN: XXXXXXX**: For example: Saveris2 SN:55602962.

TP-LINK M5350 7574 testoTabletStaging testoGuest	Signalstarke: Her Sicherheitstyp: U Funktyp: 802.11g SSID: Saveris2 SN	vorragengesich	en ner 296

4. The communication with the data Logger Network will be established:

5. Open an internet browser and type: 192.168.1.1

6. Then you will be directly connected to the Data Logger:
