

Firmware update – testo 175 and testo 176

Make sure that you don't need any data on the logger anymore. Then put the logger in RST mode by removing batteries and putting them back. Please connect the datalogger via USB to the computer. Then start the firmware update tool "Logger175176 FW upgrade v2.0.exe" by double-clicking it.

Compatibility with firmware update tool

Please be aware that only loggers with the following firmware version can be flashed with the help of the firmware update tool:

Datalogger	Firmware version
testo 175 T1	v. 1.93 or higher
testo 175 T2	v. 1.93 or higher
testo 175 T3	v. 1.91 or higher
testo 175 H1	v. 2.21 or higher
testo 176 T1	v. 1.5 or higher
testo 176 T2	v. 1.5 or higher
testo 176 T3	v. 1.3 or higher
testo 176 T4	v. 1.3 or higher
testo 176 H1	v. 1.90 or higher
testo 176 H2	v. 1.90 or higher
testo 176 P1	v. 1.90 or higher

(Data loggers with a lower firmware version cannot be updated)

Update instructions

1. Scan logger device (Please connect only one device once)

🖂 Logger175176 FW upgrade	×
